Preview Composite Gondolas

Composite gondolas will be part of the Naperville 2009 release: SAL G-7, PRR G-24 and SL-SF 85000 series. The PRR and SL-SF extended the life of their USRA gons, the PRR for

auto frame—late general--service and the SLSF for ore and coal service. The G-7s were a common sight on the SAL in the steam-diesel era. The coupon below outlines the releases.

-
